

## Group #6:

- Demo
  - Checkout was quick and build was quick and easy
  - Txt, doc and pdf work for indexing
  - Search works for indexed files
  - Have log-in for different users (teacher, student)
  - Good ui (looks similar to good ol' Google :+1:)
- JIRA
  - Completed most of the sub-tasks in Sprint 1 but wasn't able to close user stories cause there was 1 or 2 left in the story
  - Same thing happened in Sprint 2 as Sprint 1
  - Randomly checked user story and sub-tasks were linked to bitbucket
  - User stories and sub tasks had assignees and were properly assigned story points

grade: 10/10
