

Group #6:

Info:

Graded by:

[Deliverables 1-3] Stephen Luc (stephen.luc@mail.utoronto.ca),

[Deliverables 4-6] Daniel Persaud (dev.persaud@mail.utoronto.ca),

Remark Policy & Rubric: please consult the handout / course syllabus, see mark breakdown section for weighting of deliverables.

Mark Breakdown

Deliverable #1 (summary.md):	10/10
Deliverable #2 (competition.md):	10/10
Deliverable #3 (personas):	25/25
Deliverable #4 (user_stories.md):	15/25
Deliverable #5 (UI/UX):	16/20
Deliverable #6 (process.md):	10/10

Total Mark: **86/100**

TA Comments

- **User Stories**, registering should be more than low priority? Should have user stories for filtering / searching for exams etc (-5). Should have user stories related to search results (-3). No user stories for guest users without an account (-2). Make sure user stories cover & prioritize the MVP (minimum viable product - in this case the search engine requirements) before heading to stretch goals.
- **UI**, should show how filtering / searching only instructor/student/both results would work (-4)
- **Process**, good - I recommend daily standup meetings even if it's only done over facebook or slack chat.
